

SCHOOL of SOCIAL SCIENCES

where I make a difference

Kent Hymel, economics grad student, studies traffic and the economy.

Investigate

What factors influence market booms and busts? Does innovating the uranium enrichment process for nuclear energy put us at greater risk of nuclear proliferation? In tough economic times, which is best for communities – corporations or small, locally owned businesses?

Economists in the School of Social Sciences investigate issues which impact our day to day quality of life including traffic and congestion, labor, travel, market trends, clean air and alternative energy.

Innovate

Innovative research findings on airline regulation, voting procedures, freeway toll lanes, minimum wage policy and the economics of movies and happiness are regularly published in all of the top economics journals. Findings are also presented at major international conferences, referenced in policy debates, and featured prominently in local and national media including the *LA Times*, *NY Times*, *Wall Street Journal* and *OC Register*.

Impact

Economics is one of the largest and most popular majors on campus with more than 2,200 undergrads in business, quantitative or general economics. Graduates are consistently placed in leading corporate careers and top economics and business graduate programs. The 60+ student doctoral program is among the university's top producers of Ph.D.s. Together with the department's 27 faculty, they produce research findings that directly influence policy makers on a global level and define innovative solutions to changing societal needs.

Make a Difference

A gift to economics has the power to transform individuals and communities and truly make a difference. Contact us today or visit us online at www.socsci.uci.edu to learn how past donations have helped fund our future leaders.
