

SOCIOLOGY

*Professor Judith Treas's research finds why U.S. couples may be at odds over housework; graduate student Leah Ruppanner, who studies family dynamics, demonstrates this conflict with husband Casey Wagner.

INVESTIGATE

What will an increasingly older population mean for our economy and way of life? What roles do racial preferences play in dating? How many undocumented immigrants live in the United States and what does this mean for policymakers?

UCI sociologists look beyond conventional explanations to investigate how conflict, cooperation and diversity impact our world.

INNOVATE

Innovative research focuses on areas of immigration, population, gangs, inequality, social networks, social movements, families, organizations and democracy. Studies explore how employment and incarceration status can change racial perceptions, how career prioritization decisions impact husbands and wives differently, and how social movements can impact democracies.

IMPACT

UCI sociological research findings impact international population policy, design and implementation of the U.S. Census, and development of more effective communication plans for times of crisis.

Nearly 800 undergrads pursue majors in sociology each year and an additional 12,000 enroll in sociology courses. More than 80 graduate students study alongside the department's 28 distinguished faculty in areas of gender issues; virtual worlds; immigration; science, medicine and technology; markets and finance; ethnomusicology; and transnationalism.

MAKE A DIFFERENCE

A gift to sociology has the power to transform individuals and communities and truly make a difference. Contact us today or visit us online at www.socsci.uci.edu to learn how past donations have helped fund our future leaders.
